- Participate in code reviews, Agile development, and team collaboration.
- Deploy and maintain applications while ensuring security and scalability.

IMPEL IT SOLUTIONS | SOFTWARE ENGINEER Tienhoven, South Holland, Netherlands | September 2024 – December 2024

Remotely worked as a full-stack software engineer for AtMetis BV.

Developed Risk Management and Valuation, Enterprise Application for our client using Java, Spring-boot, JPA, Hibernate, MySQL and Angular.

Implemented web service using Flask framework of Python for parsing csv or xlsx files submitted by our end users.

Proactively introduced CI/CD pipeline to team members and implemented automated deployment system for our Maven application using GitLab CI/CD Pipeline.

Implemented automated tests for Angular application using Jasmine and Karma to ensure product quality.

OOZOU | SOFTWARE ENGINEER

Bangkok City, Thailand | January 2025 – December 2025

Designed and implemented an event-driven architecture for the VoIP calling system in the Bumrungrad mobile application, using Azure Event Hubs, Azure Functions, Queue Storage, and Storage Accounts to handle call events and notifications through Twilio, FCM, and APNs.

Implemented JWT token invalidation in SlimWiki, giving users control to revoke active sessions when needed. Also fixed security issues around password resets by invalidating reset links sent to previous email addresses after an email address change.

Improved SlimWikis customer onboarding experience by building interactive React and Next.js interfaces with Tailwind CSS and custom SVG animations.
